

Vibra Clean

Product Description

Vibra Clean is a biodegradable cleaner that cleans and lubricates both the parts and media in your burnishing applications. It's designed to emulsify grease and oil. This water-based product is moderate to low foaming, has built-in corrosion inhibitors and does not contain nitrites. It's safe to use on all types of metals including aluminum, steel, stainless and yellow.

DILUTION INFORMATION

Use 1 to 2 ounces per gallon of water depending on the soil conditions of the parts and media.

APPLICATION

Apply to media and parts manually or through dispenser and run parts until desired results are achieved.

SAFETY

Must read MSDS before using product. Use precautions when handling product. Always wear eye protection, gloves, apron and recommended personal protection. Always use product with proper ventilation.

Key Features

- Biodegradable
- Economical and effective at low concentrations
- Fast acting
- Excellent foaming
- Use in hot or cold water
